PROFILE

Frontend Developer with hands-on experience in building responsive web applications using HTML, CSS, JavaScript, and React.js. Currently Growing with backend development with Node.js and AI integration. Passionate about creating clean, user-friendly interfaces and continuously improving problem-solving skills.

SKILLS

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+).
- **Backend (Learning):** Node.js, Express.js, Basic API Development
- **Other Skills:** Problem Solving, Critical Thinking, Responsive Design

PROJECTS

E-Commerce Store 🔗
MERN Stack (MongoDB, Express, React, Node.js)
Built a complete online marketplace where multiple sellers can sign up to sell their products. The app allows customers to browse and buy items, while giving sellers and admins special tools to manage the business.
Key Features: Admin Panel , Seller Dashboard , Order System , Messaging System

MERN Stack Quiz Application 🔗
A Full-Stack web application for managing and taking online assessments, featuring secure Google login and role-based access for students and admins.
Key Feature : Automated Quiz Creator , Student Dashboard, Secure Authentication

Ai Content Generator 🔗
AI-Powered Content Assistant: *Built a dynamic web app integrated with the Google Gemini API to provide real-time text summarization, idea generation, and intelligent Q&A capabilities. Features a responsive UI built with vanilla JavaScript and CSS, handling asynchronous API requests and secure key management.*
